* NEN-EN13501-1 A1

Class A1 products will not contribute in any stage of the fire including the fully developed fire. For that reason they are assumed to be capable of satisfying automatically all requirements of all lower classes.

** NEN-EN 13501-1 A2-s1

Satisfying the same criteria as class B for the SBI-test according to EN 13823. In addition, under conditions of a fully developed fire these products will not significantly contribute to the fire load and fire growth.

APPLICATIONS

Private: on terraces, patios, ...

Public: hotel and catering industry, company terraces, public spaces, ...

GOOD TO KNOW

1. PEFC[®] certified wood originates from sustainably managed forests.
2. The hole in the tabletop to place an umbrella is $\varnothing 37$ mm
3. Anker combines perfectly with Inumbrina $\varnothing 32$.

FLOOR FASTENING

Anker can be fixed to the floor with our anchoring set (to be ordered separately): three jugged steel plates to be fixed with bolts. Use suitable bolts or screws from a DIY store depending on the material your terrace is made of: and combine them with this three-part floor-fastening set.

F.A.Q.

Q: Do you need to oil the wood?

A: Only if you want to maintain the original dark colour of the wood. If you don't treat it with oil, the wood will turn grey.
